

August 12, 2024

## **Key points**

- For Texas in May 2024, the Energy Information Administration (EIA) reported several record highs for the state:
  - Crude oil production: 5.67 million barrels per day (mb/d)
  - Natural gas gross withdrawals: 35.1 billion cubic feet per day (bcf/d)

- NGL production: 3.80 mb/d
- Natural gas marketed production: 32.7 bcf/d
- By TXOGA's estimates for July 2024, Texas produced 5.76 mb/d of crude oil, plus 32.8 bcf/d of natural gas marketed production and 3.85 mb/d of NGLs, which should each represent further record highs.
- > Texas' petroleum value chain highlights for May 2024 (see page 4 for complete flow chart)
  - Refiner and blender crude oil net inputs (5.69 mb/d), highest on record in EIA data since 1981.
- Texas' natural gas flow highlights for May 2024: Production more than doubled instate consumption (see page 5 for complete flow chart)
  - Texas produced 27.3 bcf/d of dry natural gas in May 2024 by TXOGA's estimates.
  - Texas consumers required 13.1 bcf/d, mainly for industry and electricity generation, while 11.7 bcf/d was exported, including 7.8 bcf/d of LNG and 3.9 bcf/d via pipelines to Mexico per U.S. International Trade Commission data.
- > Texas exported a total of \$95.7 billion in energy products during the first five months of 2024, per data from the U.S. International Trade Commission (USITC).

#### For the Electric Reliability Council of Texas (ERCOT) region in July 2024:

- Thermal and dispatchable generation provided 90% or more of electricity 5.6% of the time (42 out of 744 hours) and over 95% of electricity during three non-storm-related occasions in the month.
- ERCOT's queue of planned natural gas additions grew to 266 MW in the Monthly Outlook for Resource Adequacy (MORA) for October 2024, compared with 23.9 MW in the August 2024 edition.

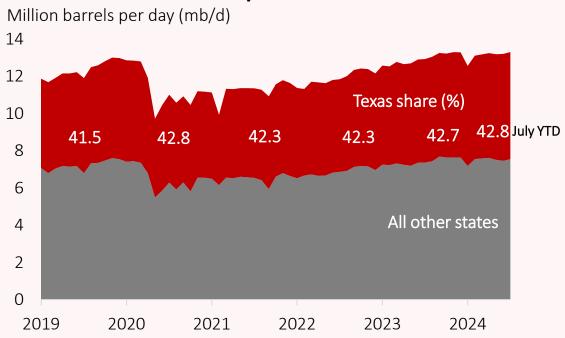

### Texas' oil and natural gas production reached new record highs

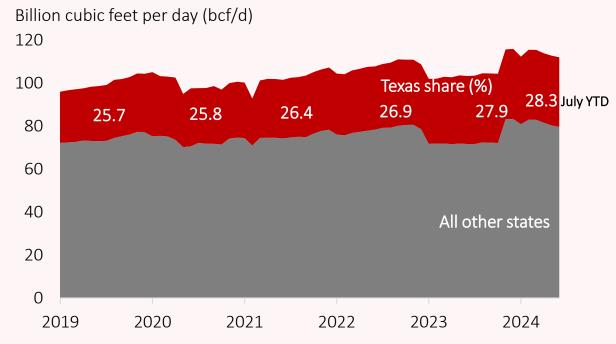

- > TXOGA's projections show that Texas set new records production records of 5.7 mb/d of crude oil and 3.85 mb/d of NGLs in July.
- EIA data for May showed Texas crude oil production at 5.67 mb/d and natural gas marketed production of 32.7 bcf/d.
- TXOGA estimates that Texas has produced 42.8% of U.S. crude oil and 28.3% of U.S. natural gas marketed production year-to-date through July 2024.

### U.S. and Texas crude oil production

#### U.S. and Texas natural gas marketed production

### Texas' petroleum value chain - May 2024: Record-high NGL production

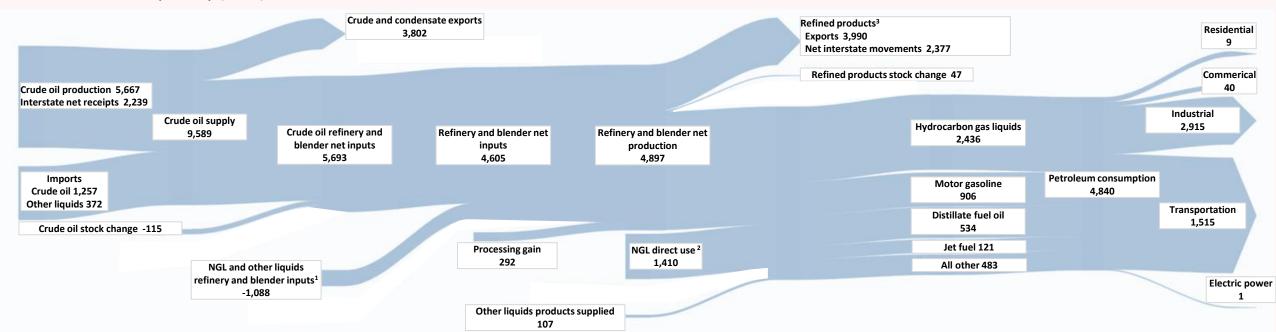

Notable facts about Texas' petroleum value chain for May 2024:

- Record-high crude oil production (5.67 mb/d) and NGL field production: 3.80 mb/d
- Record-high refiner and blender crude oil net inputs (5.69 mb/d)

#### Texas' petroleum value chain estimates for May 2024

Thousand barrels per day (kb/d)

<sup>&</sup>lt;sup>1</sup>Includes unfinished oils, hydrogen/biofuels/other hydrocarbons, and gasoline blending components

Notes: Based on EIA's preliminary data, which are subject to revision, and USITC trade data. TXOGA estimation is required for consumption by fuel and end-use sector, which influence the interstate movement calculations

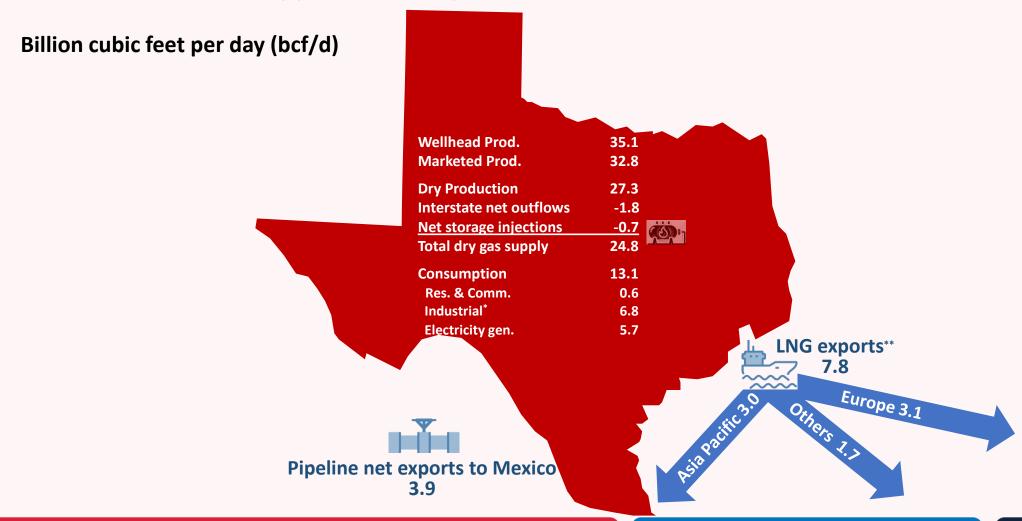

<sup>&</sup>lt;sup>2</sup> Includes NGL field production (Inland 3,617, Gulf Coast 179), biofuels net plant production (-7) minus refiner and blender net inputs (inland 14, Gulf Coast 270) and TX NGL exports (2,094)

<sup>&</sup>lt;sup>3</sup> Includes finished products and HGLs

## Texas' natural gas flows in May 2024: Record-high production has enabled strong consumption and exports

- Texas produced 27.3 bcf/d of dry natural gas in May 2024 by TXOGA's estimates
- > Texas consumers required 13.1 bcf/d, mainly for industry and electricity generation, while 11.7 bcf/d was exported, including 7.8 bcf/d of LNG and 3.9 bcf/d via pipelines to Mexico per U.S. International Trade Commission data

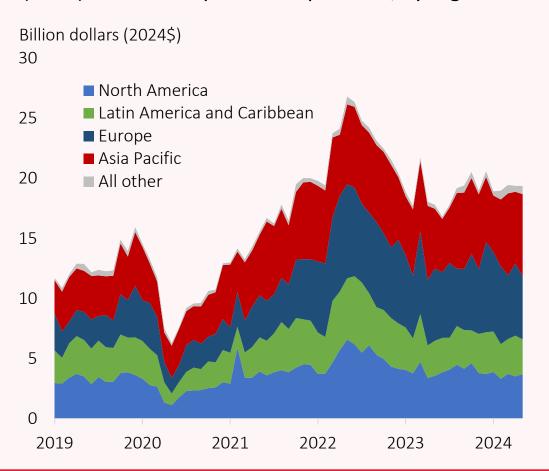

## Texas exported a total of \$95.7 billion in energy products during the first five months of 2024

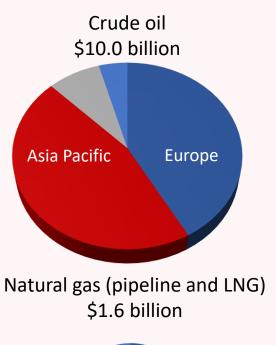

> Texas' overall energy exports appear evenly distributed among major regions, but regional product markets differ

Texas' exports of oil, natural gas, hydrocarbon gas liquids (HGLs) and refined petroleum products, by region and month

May 2024 Texas' exports by product and region \$19.7 billion

Refined petroleum products \$5.9 billion

Hydrocarbon gas liquids (HGLs) \$2.2 billion

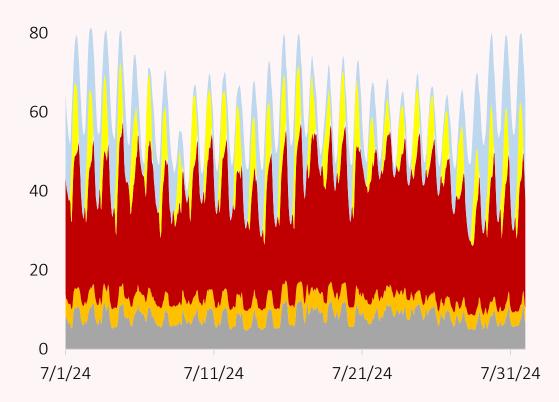

# ERCOT's queue of planned natural gas resources added over 240 MW in the Monthly Outlook for Resource Adequacy (MORA) for October 2024

- In July 2024, ERCOT relied on thermal and dispatchable generation for 90% or more of electricity 5.6% of the time (42 out of 744 hours) and for over 95% of its electricity on three non-storm-related occasions during the month.
- ERCOT's queue of planned natural gas additions grew to 266 MW in the Monthly Outlook for Resource Adequacy (MORA) for October 2024, versus 23.9 MW in the edition for August 2024.

### ERCOT planned natural gas resource additions\* (green=new)

Unit name	In Service	Type**	Installed capacity rating (MW)

### **Texas' petroleum facts at-a-glance**

### Texas highlights on EIA data for May 2024

- Crude oil production: 5.67 mb/d (record)
- Natural gas liquids production: 3.78 mb/d (record)
- Natural gas gross withdrawals: 35.1 bcf/d (record)
- Natural gas marketed production: 32.7 bcf/d (record)
- Refineries' crude oil net inputs: 5.69 mb/d (record)

### Texas' production for July 2024 by TXOGA's estimates

- Crude oil production 5.76 mb/d
- Natural gas liquids: 3.85 mb/d
- Natural gas gross withdrawals: 34.7 bcf/d
- Natural gas marketed production: 32.8 bcf/d
- Natural gas dry production: 27.3 bcf/d
